Itaipú-Confluencia

HUB: PARAGUAY-PARANA WATERWAY

PENDING TOPICS

- In 2008, it is necessary to carry out a new GTE of the Hub: Paraguay-Parana Waterway in order to complete the application of the Methodology of Indicative Territorial Zoning. This will allow to make the hub equal with the rest of the hubs.
- The consideration and observations made by the Countries in relation to the Hub must be dealt, according to what is stated in the Notes to the GTE in your possession.

THANK YOU!
