

INITIATIVE FOR THE INTEGRATION OF THE SOUTH AMERICAN INFRASTRUCTURE

SECTORIAL INTEGRATION PROCESSES

IX MEETING OF IIRSA NATIONAL COORDINATORS

Quito, November 2006

ACHIEVED RESULTS

Stage I

Elaboration of studies and diagnosis on several topics:

- Energy integration
- Air transport
- Sea transport
- Multimodal transport
- Information and communication technologies
- Border crossings
- Innovative financing instruments

ACHIEVED RESULTS

Stage II

1. Selection of pilot border crossings
 - Complex: Cristo Redentor: Argentina – Chile
 - Complex: Cúcuta, San Antonio, Ureña: Colombia – Venezuela
 - Fray Bentos - Puerto Unzué: Argentina – Uruguay
 - Foz de Iguazú - Ciudad del Este: Brasil – Paraguay
 - Desagüadero: Bolivia – Perú
2. Elaboration of studies and proposals
3. Interventions in some crossings

ACHIEVED RESULTS

Stage III

Densification of the planning process

- Methodologies were designed and applied in pilot cases in:
 - Clusters and productive chains
 - Logistics
 - Strategic environmental evaluation

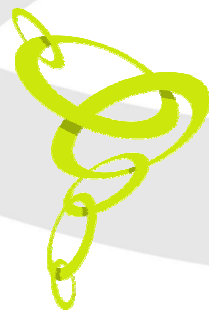

FOLLOWING STEPS

1. To complete methodologies and their applications
2. To recover the studies, methodologies and experiences and apply them:
 - To each project in particular, or
 - To each group of projects, or
 - To the EID as a whole
3. During the next meeting of the GTEs of the EID specific actions to be followed will be defined.
4. The CCT will continue to support this in-depth process related to planning.
5. Workshops to continue with the analysis of the FSG.

IIRSA –SECTORIAL PROCESSES

THANK YOU VERY MUCH!!!
